## Modern Solar to power Gold Coast United

Fledgling A-League team, Gold Coast United Football Club, has received a major boost with the announcement of a corporate sponsorship from leading renewable energy company, Modern Solar.

“Modern Solar is pleased to announce its role as a key Corporate Partner and Major Sponsor of A-League new boys Gold Coast united for the upcoming season,” said Ron Bayley, Managing Director of Modern Solar

“Like solar energy, the A-League Soccer is taking off in Australia and we’re thrilled to be involved as more and more people catch on to the ‘world game’.

“The Gold Coast is an up-and-coming city with an up-and-coming football team.

“Under the leadership of coach Miron Bleiberg and patron owner professor Clive Palmer, Gold Coast United is well-placed to become one of the most successful clubs in the A-League and in Asia; we hope our support will take that success even further.”

Mr Bayley said Modern Solar was proud to be associated with the Gold Coast.

“We place a high value on integrity, which is why we believe this is such a strong partnership,” he said.

“Gold Coast will be a leader in the A-League in the same way our commitment to quality services and products makes us a market leader in household renewable energy.

“This sponsorship is about supporting Gold Coast United and promoting sport and a healthy lifestyle in the community.”

The Modern Group is an Australia wide (Sydney, Melbourne, Brisbane, Adelaide, Perth, Hobart, Canberra) specialist home renovation and home improvement company.

*Modern Solar is part of The Modern Group - an Australian company employing around 700 people nationally. Its solar power photovoltaic (PV) systems convert sunlight directly to electricity using solar panels or solar cells mounted on rooftops. The electricity is used to provide power to homes, thus reducing electricity bills, greenhouse gas emissions and consumers' contributions to climate change.*
